american
career
college

give us eight
months and
we'll give you
a lifetime.

program overview

stop saying “i can’t” and start believing “i can.”

Education can be the difference between a short-term job and a long-term career. Your investment of time and money now can lead to success, financial stability, and an enormous sense of accomplishment in the future. The rewards last a lifetime, especially when you consider the high demand for trained professionals in the field of healthcare. So start writing your success story today. Chapter One: American Career College.

why american career college?

- > More than 30 years of experience
- > Offers healthcare programs that are in high demand
- > Modern facilities
- > Some programs can be completed in as little as 8 months

- > Classes from 6 a.m. to 10 p.m. to fit around your busy life
- > Hands-on training
- > Qualified faculty
- > Our Student Services Department helps with the day-to-day concerns you might encounter: childcare referrals, arranging carpools, awards, and more
- > On campus tutoring
- > GED preparation and testing
- > Accredited by the Accrediting Bureau of Health Education Schools (ABHES)

programs

Vocational Nursing - 13 Months

Vocational Nurses provide direct care to patients, often having the most human, face-to-face contact during a patient's stay.

Evening/Weekend classes available - 20 Months

Surgical Technology* - 20 Months

Surgical Technologists help prepare the operating room and assist in surgical procedures by operating sterilizers, lights, suction machines, and diagnostic equipment.

Health Information Technology* - 20 Months

Health Information Technologists play a critical role in monitoring, maintaining, collecting, analyzing and reporting critical data doctors, nurses and other healthcare providers rely on to provide quality healthcare to their patients.

Health Claims Examiner/Medical Biller - 9 Months

In this growing field, you'll incorporate practical skills like word processing, cost analysis, and data entry with the art of customer service and communication.

Pharmacy Technician - 8 Months

Pharmacy Technicians label and fill prescriptions, prepare IVs, distribute drugs, control inventory, and fill cassettes.

Massage Therapy - 9 Months

Massage is one of the oldest forms of therapy, using touch to aid circulation, relax the muscles, relieve stress, and increase health and well-being.

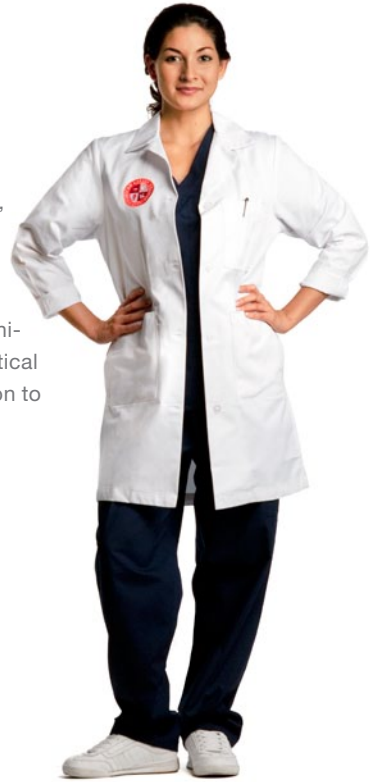

Medical Assistant - 8 Months From injections to EKGs, patient assistance to medical records, Medical Assistants are an important part of the health care team.

Optical Dispensing - 8 Months Recommend lenses, fit eyeglasses, repair broken frames, or cut, edge, tint, and insert lenses into eyeglass frames.

Dental Assisting - 9 Months Dentists rely upon their assistants to perform X-rays, dental impressions, coronal polishing, oral measurements, and more.

Respiratory Therapy* - 20 Months

Respiratory Therapists help people breathe better, whether they suffer from conditions like pneumonia, COPD, or sleep apnea.
